TECHNICAL SKILLS:

- Languages: HTML5, CSS3, | Core Python
- Tools: Git, VS Code, MySQL Workbench, Github, Excel
- Soft Skills: Communication, Teamwork, Problem Solving, Time Management

GRADUATION PROJECT:

Logistics Shipment Management System (STORKAS)
Role: Full Stack Developer
Tech Stack: HTML, CSS, Javascript , React,Node.js,Express,MySQL

Description:
Developed a Logistics Management System project to manage and track delivery and transportation details efficiently. The project helps in organizing shipment information, order status, customer details, and delivery records in a simple and user-friendly interface. Worked on creating responsive web pages using HTML, CSS, and JavaScript while focusing on clean design and smooth user experience. The project improved understanding of frontend development, data handling, and real-world business workflow management.

Key Features:

- Frontend:
- Developed the frontend using React.js, HTML, CSS, JavaScript, and Bootstrap to create a responsive and interactive user interface. Designed multiple pages with smooth navigation, clean layouts, and mobile-friendly components for better user experience. Implemented forms, validation, and dynamic content rendering to improve functionality and usability.
- Backend:
- Built the backend using Node.js and Express.js to handle server-side operations and API integration efficiently. Used MySQL database for storing and managing logistics, shipment, and customer data securely. Implemented CRUD operations and connected frontend with backend for smooth data flow and system functionality.
